ARTICLE 1

GENERAL PROVISIONS

Section 1. The by-laws contained in this article and in the articles following shall constitute and be designated as the “The Town of West Bridgewater General By-laws, Revised 2004,” and may be so cited. Insofar as their provisions are the same, in effect, as those of previously existing by-laws, they shall be construed as a continuation of such by-laws. Where their provisions are not the same in effect as those previously existing by-laws, such preexisting by-laws are hereby repealed from and after the effective date of these by-laws.

Section 2. The repeal of any by-law shall not affect any act done or any right accruing, accrued or established, or any litigation or proceeding commenced before the time such litigation or proceeding commenced before the time such repeal shall take effect, nor any offence committed, nor any penalty incurred, nor any litigation or prosecution pending at the time for any offence committed, nor for the recovery of any penalty already incurred. Any by-law hereafter which shall repeal a former by-law, shall not, when itself repealed, be construed to revive such former by-law, clause or provision, unless expressly provided in the repealing by-law.

Section 3. The Town of West Bridgewater General By-laws, Revised 2004 and the amendments or additions thereto shall be in full force and effect upon enactment at a Town Meeting, review by the Attorney General of the Commonwealth of Massachusetts, and certification and publication by the Town Clerk for a period of seven (7) days or as may be otherwise provided by the Massachusetts General Laws.

Section 4. Whenever the Town shall adopt any by-law in amendment of, or in addition to, these general by-laws, it shall be by amending or repealing the specific section of a specific article dealing with the subject matter of the proposed change. Such article and section must be referred to by number to maintain the existing structure of these by-laws. Amendments, additions and subject matter of proposed bylaws shall be enacted in accordance with the provisions of the Massachusetts General Laws and these General By-laws.

Section 5. The catchlines of sections under each article of these by-laws are intended as mere catchwords to indicate the contents of the sections, and shall not be deemed or taken to be titles of such section, nor, unless expressly so provided, shall they be so deemed when any of such sections including the catchlines, are amended or reenacted.

Section 6. It is declared to be the intention of the Town that the sections, paragraphs, sentences, clauses and phrases of this collection of by-laws are severable, and if any phrase, clause, sentence, paragraph or section shall be declared unconstitutional or invalid by judgment or decree of a court of competent jurisdiction, such unconstitutionality or invalidity shall not affect any of the remaining phrases, clauses, sentences, paragraphs and sections.

Section 7. All fines and penalties for the violation of any by-law of the Town when recovered, shall inure to the use of the Town, and be paid into the Treasury, unless otherwise directed by the General Laws or a Town By-law.

Section 8. It is the intention of these by-laws that the various boards, departments, committees and officers of the Town wherein authorized by the Town by-law establishing the duties of such board, department, committee or office, shall make such regulations as required and necessary to carry out said duties. Regulations so established shall have the effect of a by-law unless the same shall be declared unconstitutional, invalid or shall be curtailed by a Town Meeting vote. Copies of such regulations shall be filed with the Town Clerk and be made available to the public.

ARTICLE 2

Special town meetings shall be held at such times as the Board of Selectmen may direct or as otherwise provided by law.

Section 1. Check lists at the entrance to the town meeting shall be used to determine the legal voters. Non-voters shall be admitted to a town meeting only after all voters have been admitted. Non-voters may be admitted and seated as directed by the Moderator unless there is an objection. Upon an objection, non-voters may be admitted by a majority vote of the meeting.

Section 2. All articles in the warrant shall be acted upon in the order of their arrangement, unless the meeting by vote otherwise determines.

Section 3. Any report, resolution or motion shall be reduced to writing if the Moderator so directs.

Section 4. No person shall address the meeting unless recognized by the Moderator, nor speak more than once on the same subject to the exclusion of any other who may desire to speak.

Section 5. Any person who is employed as an agent by another interested in any matter under discussion at a town meeting shall disclose the fact of his employment before speaking thereon.

Section 7. All committees shall be appointed by the Moderator, unless the town otherwise directs, and shall report as directed by the town. If a committee does not report as directed or at the next annual town meeting held thereafter, it shall be deemed discharged, unless an extension of time be granted by the town.

Section 8. When a report of a committee is placed in the hands of the Moderator, it shall be deemed to be properly before the meeting for its action thereon, and a vote to accept the same shall discharge the committee. For the adoption of recommendations of the committee, however, a specific vote shall be required. No appropriation shall be made under the report of any committee of the Town until the matter has been considered and reported upon by the Finance Committee.

Section 10. Any voter may immediately rise to question the determination of a voice vote by the Moderator, and if supported by (6) six or more voters, may request a counted vote.

Section 11. On matters requiring a two-thirds vote by statute, a count need not be taken and the vote recorded unless the vote so declared is immediately questioned by seven (7) or more voters as provided for by M.G.L., Chapter 39, Section 15 or as otherwise provided in these by-laws.

Section 12. A ballot vote on any article may be requested by the Board of Selectmen, Finance Committee or Town Moderator. Also, any voter from the floor may request a ballot vote if supported by seven (7) voters.

Section 13. No motion, the effect of which would be to dissolve the meeting, shall be in order until every article in the warrant has been duly considered and acted upon, but this shall not preclude the postponement of the consideration of any article to an adjournment of the meeting to a stated time.

Section 14. The duties of the Moderator not especially provided by law or these by-laws, shall be determined by the rules of practice contained in Town Meeting Time, a Handbook of Parliamentary Law, so far as the same is applicable to the town meeting.

WEST BRIDGEWATER RIGHT- TO-FARM BY-LAW

Section 1. Legislative Purpose and Intent. The purpose and intent of this By-law is to state with emphasis the Right-to-Farm accorded to all citizens of the Commonwealth under Article 97, of the Constitution, and all state statutes and regulations thereunder including but not limited to Massachusetts General Laws Chapter 40A, Section 3, Paragraph 1; Chapter 90, Section 9, Chapter 111, Section 125A and Chapter 128, Section IA. This By-law does not seek to change these state laws but to bring them together in one local By-law to enhance local understanding of “the right to farm.”

This By-law encourages the pursuit of agriculture, promotes agriculture-based economic opportunities, and protects farmland within the Town of West Bridgewater by allowing agricultural uses and related activities to function with minimal conflict with abutters and Town agencies. This By-law shall apply to all jurisdictional areas within the Town.

Section 2. Definitions.

- a. The word "farm" shall include any parcel or contiguous parcels of land, or water bodies used for the primary purpose of commercial agricultural, or accessory thereto.

- b. The words "farming" or "agriculture" or their derivatives shall include, but not be limited to the following:

 - growing and harvesting of forest products upon forest land, and any other forest or lumbering operations;
 - raising of livestock including horses;

The above described agricultural activities may occur on holidays, weekdays, and weekends by night or day and shall include the attendant incidental noise, odors, dust, and fumes associated with normally accepted agricultural practices. It is hereby determined that whatever impact may be caused to others through the normal practice of agriculture is more than offset by the benefits of farming to the neighborhood, community, and society in general. The benefits and protections of this By- law are intended to apply exclusively to those commercial agricultural and farming operations and activities conducted in accordance

with generally accepted agricultural practices. Moreover, nothing in this Right -To-Farm By-law shall be deemed as acquiring any interest in land, or as imposing any land use regulation, which is properly the subject of state statute, regulation, or local zoning law.

Section 4. Disclosure Notification. Within 30 days after this By-law becomes effective, the Board of Selectmen shall prominently post in the Town Hall, make available in the public area in Town Hall and with other free local media and make available for distribution the following disclosure:

"It is the policy of this community to conserve, protect and encourage the maintenance and improvement of agricultural land for the production of food, and other agricultural products, and also for its natural and ecological value. This disclosure notification is to inform buyers and occupants that the property they are about to acquire or occupy lies within a town where farming activities occur. Such farming activities may include, but are not limited to, activities that cause noise, dust and odors. Buyers and occupants are also informed that the location of property within the Town may be impacted by commercial agricultural operations including the ability to access water services for such property under certain circumstances."

In addition to the above, not later than 21 days after a purchase and sale agreement is entered into, or prior to the sale or exchange of real property if no purchase and sale agreement exists, for the purchase or exchange of real property or prior to the acquisition of a leasehold interest or other possessory interest in real property in Town, a Town landowner shall present the buyer or occupant with the above disclosure notice on a form prepared by the town and signed by both the landowner and the buyer or occupant. A copy of this signed disclosure form must be filed with the Board of Selectmen or its designee prior to the sale, purchase, exchange or occupancy of such real property.

A violation of this section shall be subject to a fine of \$300 and shall be enforced by the Board of Selectmen or its designee in accordance with the non-criminal disposition provision of MGL chapter 40, section 21D.

Section 5. Resolution of Disputes. Any person who seeks to complain about the operation of a farm is encouraged to prior to filing a formal complaint, file an informal complaint (grievance) with the Board of Selectmen, the Zoning Enforcement Officer, or the Board of Health, depending upon the nature of the grievance. The filing of the grievance does not suspend the time within which to pursue any other available remedies that the aggrieved may have. The Zoning Enforcement Officer or Board of Selectmen shall forward a copy of the grievance to the Agricultural Commission, which shall review and facilitate the resolution of the grievance, and report its recommendations to the referring Town authority within an agreed upon time frame.

The Board of Health, except in cases of imminent danger or public health risk, shall forward a copy of the grievance to the Agricultural Commission, which shall review and facilitate the resolution of the grievance, and report its recommendations to the Board of Health within an agreed upon time frame.

dd. Temporary patch: The application of either cold patch or two separate gradations of bituminous concrete consisting of binder and top layers and compaction to achieve a density equal to that of the surrounding pavement following excavation and compaction.

Section 3. General. No work (except the commencement of emergency repair work in accordance with paragraph VII hereof) in or under a public way shall commence until the Applicant shall have applied for in accordance with Paragraph IV, and obtained from the Board, a street opening permit. All work contemplated by this by-law shall be done in a good and workmanlike manner using best engineering and construction practices and shall be done in accordance with (i) all applicable laws and regulations, (ii) all of the provisions of this by-law, (iii) any conditions contained in the street opening permit, and (iv) such reasonable supplemental instructions not inconsistent with the foregoing as the Board of Selectmen or its representative may from time to time issue. A permit holder shall cause to be restored those portions of a public way disturbed by the permit holder to as good a permanent condition, in the reasonable judgment of Board of Selectmen or its representative, as they were in when permit holder made application thereunder.

No person or entity may perform any work (including street opening work or emergency repair work) in or under a public way unless it is a permit holder and (i) is a municipal department or public utility or their respective officers or employees (ii) is the holder of a current and valid public works construction license, or (iii) has engaged such a holder and such holder performs all such street opening work or emergency repair work as agent of permit holder.

Section 4. Application Procedure. The Applicant shall file on forms designated by the Board of Selectmen a completed and signed application at the office of the Board of Selectmen (with a copy delivered simultaneously to the Highway Department) each time it desires to perform street opening work. The application shall be accompanied by any and all plans, certifications, certificates of insurance and other items specified in the application or reasonably requested by the Board of Selectmen. If the Applicant does not intend to perform the street opening work itself, it must in the application designate a licensed contractor to perform the work as its agent. The application shall also be accompanied by the application fee and the refundable deposit.

The Highway Department shall promptly review the application and make written recommendations concerning approval to the Board of Selectmen and, if appropriate, shall include recommendations concerning permit conditions and supplemental instructions.

The Board of Selectmen shall make a prompt determination on the application taking into account the following and such other facts as it may reasonably consider:

- a. the recommendation of the Highway Department
- b. the reason for the street opening work
- c. whether the street is recently constructed or repaved
- d. whether there are other reasonable means adequate to accomplish the purpose for which the street opening permit is sought.

If the application is considered favorably, a street opening permit containing such conditions and supplemental instructions as the Board of Selectmen reasonably deems appropriate shall promptly issue. If the application is not favorably considered, the Board of Selectmen shall communicate in writing to Applicant the reasons its application was not favorably considered.

Section 5. Refundable Deposit and Account. The amount of the refundable deposit to secure proper restoration of a public way after street opening work is determined in the reasonable judgment of the Board of Selectmen based on the extent of the work. (A current schedule of deposits for standard work is attached.)

Following notice given by permit holder that final permanent repairs to the public way have been completed, the Board of Selectmen or representative will make a final inspection. Once the Board or its representative has concluded that permanent repair work has been satisfactorily concluded and that Applicant has no other uncured defaults under street opening permits, it shall release the unexpended balance of the deposit serving as security for the street opening permit related to the inspected work.

All refundable deposits that an Applicant submits for street opening permits shall be held by the Board of Selectmen in one account which shall be designated as the Applicant's refundable deposit account. Applicants upon request may receive periodic reports as to the balance standing within this account. Should a deposit associated with a specific permit be insufficient to secure the proper repair of a public way following a default by the permit holder, the Board of Selectmen without limitation to other remedies available to it can deduct the cost of the proper repair from Applicant's refundable deposit account for the purpose of funding the proper repairs. To the extent required by Chapter 164 of the General Laws applicable to gas companies, the provisions of this Section and Section VI hereafter shall not be applied to gas companies which in their application for street opening permits claim the exemption set out herein.

Section 6. Fee and Deposit Changes; Municipal Exemption. From time to time hereafter the Board of Selectmen, after public notice and hearing, may amend the schedule of deposits, the application fee, the hourly after-hours inspection charges or any other amounts due under this by-law. A reasonable hourly charge for inspectional services which must be performed outside of

normal working hours in accordance with a posted schedule established by the Board of Selectmen will be billed to permit holder and due and payable fifteen days after billing. In extraordinary situations where extensive installation or renewal of utility lines overburden the normal capacity of the municipal departments to conduct inspections, the Board of Selectmen can, after notice to permit holder or as a condition of the permit, elect to treat all inspections as after-hours inspections and bill permit holder accordingly. Applicants which are municipal departments are exempt from payment of all fees and deposits hereunder. Public utilities to the extent exempted as provided in Paragraph V above are exempt from payment of all fees except the application fee.

Section 7. Emergency Repair Procedure. If the conditions for emergency repair work exist, then an Applicant after giving oral, faxed or electronic notice to the Police and Highway Departments may commence street opening work. All such emergency repair work shall be done in strict compliance with this by-law except for compliance with any notice provision inconsistent with such emergency action.

On the business day following the commencement of emergency repair work, the Applicant shall file with the Board of Selectmen (i) a written statement setting forth in detail the facts and circumstances constituting the conditions for emergency repair work, (ii) an application for a street opening permit covering the street opening work already commenced in accordance with Paragraph IV, (iii) the filing fee and required refundable deposit. If all of the materials such as plans, etc. are not then available to Applicant, Applicant will supply them as soon as available. Board of Selectmen will promptly process the application and grant the street opening permit with such conditions and supplemental instructions as it may reasonably require.

Section 8. Insurance. The permit holder and/or each licensed contractor shall acquire and continuously maintain while it possesses any street opening permits liability insurance coverage on all personnel and equipment to be used in the street opening work which insurance is to be with insurance companies licensed to do business in the Commonwealth of Massachusetts and shall contain the following coverages and be in the following minimum amounts:

Certificates of Insurance shall provide for at least thirty (30) days notice to the Board of Selectmen of cancellation or material change. The name of the municipality shall be listed as an additional insured on the Certificate of Insurance.

Section 9. Licensed Contractors. Any contractor or other person or entity that wishes to perform work on a public way and which is not either a municipality or a public utility (including their respective officers or employees) must be licensed by the Board of Selectmen. Application for a public works construction license must be made on a yearly basis. (See appropriate sections of the General by-laws.)

Section 10. Terms of the Street Opening Permit

1. Term of Permit. All street opening permits shall be valid for thirty days and, upon written request to the Board of Selectmen, renewable for an additional thirty days. Permits must be present at the work site. Permits can be revoked by the Board of Selectmen if the Applicant is in default.

2. Inspections. Inspections may take place at the following events:

- a. prior to backfilling the trench
- b. following completion of temporary patch placement
- c. during the permanent patch Window
- d. following completion of permanent patch placement

Permit holder or contractor will notify Board of Selectmen representative when an inspection is desired and coordinate the timing of such inspection.

3. Working Hours. Except in emergency situations, street opening work will occur during normal working hours. The permit holder must give notice of the intended street opening work seventy-two hours in advance to the Highway Superintendent, and, unless the requirement for a police detail is waived by the Police Chief, must arrange for and pay for a police detail to be present throughout the period of time that street opening work is being conducted.

4. Dig-Safe. The permit holder shall, in accordance with all current laws of the Commonwealth of Massachusetts, notify all public utilities seventy-two hours in advance of making any excavation in a street. Such notification shall be made by means of obtaining a DIG-SAFE number. Said number shall be provided on the street opening permit application. The permit shall not be issued until this information is provided.

5. Existing Utilities. Before starting any excavation, the permit holder or contractor must confer with all public utilities to obtain information from each as to the horizontal and vertical locations of existing utilities and other conditions that may affect the excavation. The permit holder or contractor shall not interfere with any existing utility without the written consent of the Board of Selectmen representative and the owner of the utility. If it becomes necessary to relocate an existing utility, this shall be done by its owner and the cost of such work shall be borne by the permit holder. The permit holder or contractor shall inform itself as to the existence and location of all underground utilities and protect the same against damage.

6. Protection of Existing Lines and Structures. The permit holder or contractor shall adequately support and protect by timbers, sheeting, etc. all pipes, conduits, poles, wires, cables or other appurtenances which may be in any way affected by the excavation work and shall do everything necessary to support, sustain and protect them under, over, along or across such work area. The excavation work shall be performed and conducted in such a manner that it shall not interfere with access to fire stations, fire hydrants, water gates, underground vaults, catch basins or any other public structure.

7. Adjoining Property. The permit holder or contractor shall, at all times and at its own expense, preserve and protect from injury any adjoining property by providing proper foundations and shall take such other precautions as may be necessary for this purpose. The permit holder or contractor shall at all times and at its own expense shore up and protect all buildings, walls, fences, trees and other property likely to be damaged during the progress of the street opening work and shall be responsible for all damages to public or private property or streets resulting from its failure to properly protect and carry out said work. The permit holder or contractor shall not remove, even temporarily, any trees or shrubs which exist in planting strip areas without first obtaining the consent of the Highway Superintendent.

8. Damaged Trees. In the event a tree is either accidentally destroyed by the permit holder or contractor or is authorized for removal by the Board of Selectmen representative, the permit holder or contractor shall remove the tree, stump and debris from the work site, and replace the tree with an identical species with a minimum caliper of two inches in the identical location.

9. Pedestrian Crossings, Open Trenches. The permit holder or contractor shall, where possible, maintain safe crossings for two lanes of vehicle traffic at all public intersections as well as safe crossings for pedestrians at intervals of not more than three hundred (300) feet. If any excavation is made across a public way, it shall be made in sections to assure maximum safe crossing for vehicles and pedestrians. An open trench may not exceed three hundred (300) feet

unless specifically permitted by the Board of Selectmen or its representative. If the public way is not wide enough to hold the excavated material for temporary storage, the material shall be immediately removed from the location.

10. Traffic. The permit holder or contractor shall take appropriate measures to assure that during the performance of the street opening work, so far as practicable, normal traffic conditions shall be maintained at all times so as to cause as little inconvenience as possible to the occupants of the adjoining property and to the general public. The Board of Selectmen representative may permit the closing of streets and walks to all traffic for a period of time. Unless the requirement for a police detail is waived by the Police Chief, the permit holder shall engage a police detail to maintain traffic control and public safety at the project site while street opening work is in progress. Warning signs shall be placed a sufficient distance from the project site in order to alert all traffic coming from both directions. Cones or other approved devices shall be placed to channel traffic. Warning signs, lights and such other precautions shall conform to the Manual on Uniform Traffic Control Devices. Construction materials and equipment on the site shall be limited in quantity and in the space they occupy so that they do not unduly hinder and block traffic.

11. Gutters and Basins. The permit holder or contractor shall maintain all gutters free and unobstructed for the full depth of the adjacent curb and for at least one (1) foot in width from the face of such curb at the gutter line. Catch basins shall be kept clear and serviceable.

12. Excavated Material. The permit holder or contractor shall remove all excess excavated material, surplus water, muck, silt, residue or other run-off pumped or removed from excavations from the site.

13. Temporary Repairs. At the end of each day, all trenches must be plated if repair work is not completed and/or back-filled, compacted and temporarily patched on the day repair work is completed. No open un-plated trenches are permitted overnight and work in plated trenches must be continually prosecuted to completion to minimize the time trenches are plated.

14. Noise. The permit holder or contractor shall perform the work in such a manner as to avoid unnecessary inconvenience and annoyance to the general public and occupants of neighboring property. During the hours from 10:00 p.m. to 7:00 a.m., the permit holder or contractor shall not use, unless otherwise specifically permitted by the Board of Selectmen or its representative any tool, appliance or equipment producing noise of sufficient volume to disturb the sleep or repose of occupants of the neighboring property.

15. Debris and Litter. All debris and litter remaining from the street opening work site shall be removed by the permit holder or contractor in a timely manner.

16. Restoration of Pavement Markings. All permanent pavement markings (crosswalks, center lines, fog lines) which are damaged during street opening work shall be restored in kind by and at the expense of the permit holder.

17. Lawn Surfaces and Plantings. All lawn surfaces which are disturbed during street opening work shall be replaced with sod or six (6) inches of screened loam, lime, fertilized and re-seeded with good quality lawn seed. Any areas containing plantings shall be restored to their original condition with the same or similar plantings.

18. Erosion Control. The permit holder shall be responsible for all erosion control and for obtaining any necessary permits from the Conservation Commission. The permit holder or contractor shall protect drainage structures from siltation by whatever means required, including but not limited to the installation of hay bales and/or filter fabric. In the event that a drainage structure becomes damaged from siltation as a result of the street opening work, the permit holder or contractor shall clean the structure before completing the temporary patch.

Section 11. Required Construction Techniques. All street opening work and materials used therein must conform to the Mass. Highway Department's Standard Specifications for Highways and Bridges, 1995 edition, and with the Americans with Disabilities Act and the Architectural Access Board Regulations as currently in effect. In addition, the following specific requirements also apply. Exceptions to these requirements may be made in the discretion of the Board of Selectmen or its representative at the time that the street opening work is in progress.

1. Excavation. Existing pavement shall be cut in neat, true lines along the area of the proposed excavation. Unstable pavement shall be removed over cave-outs and breaks and the sub-grade treated as the main trench. Pavement edges shall be trimmed to a vertical face and neatly aligned with the center line of the trench. Cut-outs beyond the limits of the trench lines must be normal or aligned parallel to the center line of the trench. Excavations shall be made in open cut. Trenches and excavations shall be braced and sheathed in accordance with the requirements of the Occupational Safety and Health Act (OSHA). Sections of bituminous or cement concrete sidewalks shall be removed to the nearest scoreline or approved cut edge.

2. Back-Filling and Compaction. Excavations shall be filled with approved backfill. Approved backfill consists of either controlled density fill, suitable excavated material or gravel meeting M 1.03.0 or M 1.03.1 of The Standard Specifications. The permit holder may select which of these three to use in the excavation. Suitable excavated material shall mean previously excavated granular material but which does not include blacktop, clay, silt, organic material, concrete, roots, boulders or stones larger than four inches in diameter. If the hole is to be filled with suitable excavated material, a backfill course shall be placed in approximately twelve (12) inch lifts of maximum compaction to four inches below asphalt grade (See Diagrams 1, 2, and 3). A base course consisting of four inches of processed gravel or equivalent (i.e. suitable excavated material containing no stones larger than one and one-half inch in diameter) shall then be placed on top of the backfill course. The backfill and base course shall be compacted to not less than ninety-five (95) percent of maximum dry density as determined by the modified proctor test in accordance with ASTM 1557 Method D. The permit holder if directed by the Board of Selectmen or its representative will retain at its expense, a professionally qualified geotechnical

consultant to perform this test. The results of this test shall be given to the Highway Superintendent.

If controlled density fill is used as back-fill material, it must contain a minimum of 250 pounds of class F flyash or high air (25% plus) and be self-leveling. It must be Type 1E or 2E (very flowable). Flowable fill is to be batched at a ready mix plant and is to be used at a high or very high slump (1"-12"). In lieu of the slump test, a 6" long, 3" diameter tube may be filled to the top and then slowly raised. The diameter of the resulting "pancake" may be measured and the range of the diameter shall be 9" to 14". It shall be flowable, require no vibration and after it is placed excavatable by hand tools and/or small machines.

The ingredients shall comply with the following:

Portland cement	AASHTO M85
Fly Ash	AASHTO M 295 Class F
Sand	M 4.02.02- ASTM C33 sand
Air	M 4.02.05

Type 1E and 2E must meet the following requirements:

Compressive	28 days	90 days
Strength	30-80 psi	100 psi ma.
Slump		10-12 inches
Air		1-30%

If controlled density fill is used as back-fill material, it must fill the excavation to immediately below asphalt grade. The contractor must then plate the excavation with a heavy duty steel plate adequate to carry heavy traffic and wait twenty-four hours for the CDF to cure prior to applying the permanent patch.

If an excavation is back-filled with controlled density fill in accordance with this by-law, then a temporary patch need not be installed but a permanent patch may be installed immediately. permanent patches installed over controlled density fill shall consist of four (4) inches of bituminous concrete applied in a two and one-half inch base course and a one and one-half inch top course of bituminous concrete all installed in accordance with this by-law. If an excavation in a cement concrete public way is filled with controlled density fill, then the provisions of paragraph 5 (a) of this by-law may be omitted, but the provisions of paragraph 5(b) and 5(c) must be complied with.

3. Temporary Patches

a. Bituminous Concrete. Following proper compaction, a temporary patch which shall be the thickness of the existing asphalt pavement or a minimum of four

inches whichever is greater shall be applied. It shall consist of either cold patch or bituminous concrete plant-mixed hot asphalt aggregate. (See Diagrams)

b. Temporary Patch To Be Maintained For One Year. A temporary patch that has been back-filled and compacted shall be maintained by the permit holder or contractor so that the patched surface and the surrounding area remain a single smooth unbroken plane for a period of time no shorter than one year after placement of the temporary patch.

4. Permanent Patches. Except when installed over controlled density fill as described in paragraph 2 above, permanent patches shall be installed not less than twelve nor more than eighteen months from the date of installation of the temporary patch. Upon request by the permit holder or contractor, the Board of Selectmen representative will inspect the temporary patch and determine if final settlement of the trench has occurred. The Board of Selectmen representative will notify the permit holder or contractor within seven days of the inspection whether the permanent patch can be installed. Public utilities or municipal departments may schedule permanent patches to replace all temporary patches then within the permanent patch window without receiving prior approval from the Board of Selectmen but must give the Board and its representative not less than seventy-two hours prior notice.

A permanent patch shall consist of one of the following: a) cold planing the temporary patch to a depth of one and one-half inches and then installing a minimum of one and one half inches of top course of bituminous concrete, or b) the excavation of the temporary patch in a bituminous concrete public way and replacement of this material with any additional processed gravel needed and two and one half inches of base course and one and one-half inches of top course of bituminous concrete (See Diagrams 1 and 2) or (c) application of the infra-red process to the temporary patch, or d) the certification by the Board of Selectmen representative made during the permanent patch window that the temporary patch in his reasonable judgment meets fully the standard of a permanent patch and thus requires no further work.

a. Cold Planing. If the cold planing method is used, the area to be cold planed must extend at least twelve (12) inches beyond all sides of the existing temporary patch. (See Diagram 2) This area must be cold planed to a depth of one and one-half inches. Any broken or irregular edges of existing pavement shall be cut away in straight lines leaving a sound vertical face at least twelve (12) inches back from all edges of the existing pavement. The permit holder must provide a dust control system capable of complying with environmental air quality standards during cold planing and sweep the public way following completion of the cold planing work. All abutting edges of the existing pavement will be painted with an asphalt emulsion immediately prior to the placement of the permanent patch. The permanent patch will consist of the application of a top course of a minimum of one and one-half inches of bituminous concrete plant-mixed hot asphalt aggregate. After raking and rolling, the grade of the permanent patch shall match the existing bituminous surface of adjacent pavement. The finished permanent patch shall be level having no depressions retaining water on any of the

surface. All seams of the finished perimeter shall be sealed with penetrating asphalt emulsion.

b. Excavation. Any temporary patch that has been patched with cold patch must be excavated and replaced with a bituminous concrete base in accordance with this paragraph. If the excavation method is chosen and if additional cutting of the existing pavement is required, it shall be done in neat straight lines. Any broken or irregular edges of existing pavement shall be cut away in straight lines leaving a sound vertical face at least twelve (12) inches back from all edges of the existing pavement. (See Diagram 1 and 3). All abutting edges of the existing pavement shall be painted with an asphalt emulsion immediately prior to the placement of the permanent patch. The permit holder or contractor shall remove and dispose of all excavated material and thoroughly compact the surface of the sub-base.

Following excavation the permanent patch shall consist of a bituminous concrete base and top laid and rolled in two (2) courses. The binder (base course) shall be a minimum of two and one half (2 ½) inches in depth and the top course shall be one and one half (1 ½) inches in depth. The minimum total thickness of both courses, measured after rolling, shall be four (4) inches or equal to the material that was previously excavated. If after compaction, more than four inches of permanent patch is needed in order to restore the excavated area to finish grade, additional bituminous concrete shall be used in the base course. The base course shall be placed and carefully raked and thoroughly rolled to the required thickness. The top course shall be placed to a grade that will match the existing bituminous surface after rolling. All seams of the finished perimeter shall be sealed with penetrating asphalt emulsion. The finished permanent patch shall be level having no depressions retaining water on any of the surface.

c. Infra-Red Process. If the infra-red process is utilized to install the permanent patch, the area to be repaired shall be thoroughly cleaned to eliminate all potential contaminants. An infrared heater shall be positioned over the area to be repaired for a period of time required to plasticize the existing pavement to a depth of one and one half inches. Oxidation of the pavement caused by improper heating techniques must be avoided. If this condition occurs, all oxidized material must be removed and replaced with Class I bituminous concrete meeting the standard specifications of the Mass. Highway Dept.

The softened area shall be inwardly reworked from approximately one foot beyond all sides of the original temporary patch. This designated area shall be treated with a penetrating asphalt emulsion, uniformly scarified and raked to a workable condition. For street crossings and/or trenches with jogs, the reworked area will be extended beyond the outermost jog in a straight line parallel with the opposite outermost jog. Under no circumstances may the infrared heat treatable patching mix that is used register a temperature under 200 degrees F.

After the paving mixture has been properly admixed and raked to grade, compacting shall be obtained by use of a steel-wheeled roller of sufficient weight to establish a uniform density comparable to that of the surrounding pavement surface within the work area. The finished permanent patch shall be level having no depressions retaining water on any of the surface. All seams of the finished perimeter shall be sealed with penetrating asphalt emulsion.

A petroleum resin sealant shall be applied consistently to the entire heated area by mechanical means or hand application at an approximate rate between .1 and .25 gallons per square yard. Actual rate will be determined on site by an approved absorption test method. A mineral filler will then be broadcast over the newly sealed area to absorb any excess liquid and prevent tracking and the area immediately opened to traffic.

d. Certification. If a permit holder seeks to qualify a temporary patch as a permanent patch, it must make the application for inspection set out above and specify in it its request for certification. The Board of Selectmen representative will notify the permit holder within thirty days of the request whether the temporary patch has been certified as a permanent patch. If it is not so certified, the permit holder shall forthwith cause a permanent patch utilizing one of the three remaining methods set out above to be utilized.

e. Newly Paved Roads. On newly paved roads, the Board of Selectmen representative may require in addition to the placement of the permanent patch, that the permanent patch shall be treated by a process (infra-red, microwave or equivalent) that will ensure that the permanent patch is integrated into the existing bituminous surface in a seamless manner.

f. Final Inspection of Permanent Patch. Following completion of the permanent patch, the permit holder or contractor shall give notice thereof to the Board of Selectmen representative who shall inspect the permanent patch. If the Board of Selectmen representative is satisfied that the road has been restored to as good a condition as existed prior to the street opening work, he shall so note on the street opening permit and any refundable deposit securing that street opening work shall be refunded promptly to Applicant. If the Board of Selectmen representative determines that the permit holder is in default, the Board of Selectmen may proceed in accordance with Paragraph XIII, Remedies, of this by-law.

5. Special Rules for Cement Concrete Roadways. Any excavation in a cement concrete public way or public way with a cement concrete base with a bituminous concrete surface shall be backfilled as described in paragraph 2 and temporarily patched as described in paragraph 3. Immediately prior to the installation of a permanent patch, the following shall be done:

- a. the temporary patch and sufficient back-filled material shall be removed.

b. a six-inch reinforced concrete slab shall be laid over the back-filled trench extending one (1) foot beyond all edges of the trench surface and allowing for four (4) inches of bituminous concrete to be installed above the slab. The slab shall have steel reinforcing for tensile strength in accordance with good engineering practices. The permit holder or contractor shall install a temporary heavy duty steel plate adequate to carry heavy traffic over the trench until the concrete slab shall have adequately cured.

c. once the concrete slab shall have cured, there shall be installed a four (4) inch layer of bituminous concrete applied in a two and one-half inch base course and a one and one-half inch top course all in accordance with Diagram 3 and generally in accordance with this by-law.

6. Shoulders. Suitable excavated material shall be placed in layers not to exceed six (6) inches in depth and compacted. Shoulders shall be re-constructed to their existing condition and either loamed with six (6) inches of loam, limed, fertilized and seeded with roadside grass mix or covered with four (4) inches of wood chips as directed by the Board of Selectmen representative.

7. Sidewalks. Any excavation in a concrete or bituminous concrete sidewalk shall require that the entire sidewalk area containing the trench be replaced. Any concrete sidewalk section that is excavated or damaged by the excavation must be replaced in its entirety. Suitable excavated material or gravel shall be placed in layers not to exceed six (6) inches in depth and compacted. All sidewalk areas will be installed by the permit holder or contractor in conformance with the ADA and the Architectural Access Board Regulations currently in effect. Bituminous concrete sidewalks shall have two courses (two inches of binder and one inch of top) of bituminous concrete plant-mixed hot asphalt aggregate applied to and rolled to create a pavement surface consistent with the adjacent bituminous concrete surface. Concrete sidewalks shall have four inches of poured concrete applied to finish grade. The concrete shall be placed in alternate slabs 9 meters in length except as otherwise ordered. The Commission may waive the filing fee and costs and expenses for an application or request filed by a government agency and shall waive them for a request for determination filed by a person having no financial connection with the property which is the subject of the request.

e. Payment of Consultant Fee. Upon receipt of an application, or at any point during the hearing process, the Commission is authorized to require an applicant to pay a fee for the reasonable costs and expenses borne by the Commission for specific engineering and other consultant services deemed necessary by the Commission to come to a final decision on the application. This fee is called the "consultant fee". The specific consultant services may include, but are not limited to, performing or verifying the accuracy of resource area survey and delineation; analyzing resource area functions and values, including wildlife habitat evaluations, hydrogeologic and drainage analysis; and researching environmental or land use law.

f. Deposit of Consultant Fee. If a municipal revolving fund has been established, pursuant to G.L. c. 44 §53E½, for deposit and Commission use of filing and/or consultant fees described above, then such filing and/or consultant fees shall be deposited therein for uses set out in the vote establishing the fund. This account shall be kept separate from the account established for filing fees paid under the state Wetlands Protection Act.

g. Determination of Consultant Fee. The exercise of discretion by the Commission in making its determination to require the payment of a consultant fee shall be based upon its reasonable finding that additional information is necessary

for the making of an objective decision. Any applicant aggrieved by the imposition of, or size of, the consultant fee, or any act related thereto, may appeal according to the provisions of the Massachusetts General Laws.

h. Consultant Fee. The consultant fee shall be the actual cost to the Commission for engineering and consultant services deemed necessary by the Commission to come to a final decision on an application. The Commission shall require an estimated or actual payment, in their discretion, of the consultant fee in advance of any engineering or consultant services.

Section 7. Notice and Hearings

a. Notice. Any person filing an application for a permit, abbreviated notice of resource area delineation or a request for determination with the Commission shall, at the same time, give written notice thereof, by certified mail return receipt requested, or hand delivered, to all abutters at their mailing addresses shown on the most recent applicable tax list of the assessors, including owners of land directly opposite on any public or private street or way, and abutters to the abutters within three hundred (300) feet of the property line of the applicant, including any in another municipality or across a body of water. The notice to abutters shall have enclosed a copy of the application or request with plans, or shall state where copies may be examined and obtained by abutters. An affidavit of the person providing such notice, with a copy of the notice mailed or delivered, shall be filed with the Commission. When a person requesting a determination is other than the owner, the request, the notice of the hearing, and the determination itself shall be sent by the Commission to the owner as well as to the person making the request.

b. Public Hearing. The Commission shall conduct a public hearing on any application for a permit, abbreviated notice of resource area delineation, or request for determination with written notice given at the expense of the applicant, at least five (5) business days prior to the hearing, in a newspaper of general circulation in the municipality. The Commission shall commence the public hearing within twenty-one (21) days from receipt of a completed permit application or request for determination unless an extension is authorized in writing by the applicant. The Commission shall have authority to continue the hearing to a specific date announced at the hearing for reasons stated at the hearing, which may include the need for additional information from the applicant or others deemed necessary by the Commission including the comments and recommendations of the boards and officials listed in Section 8 below. The

Commission, in an appropriate case, may combine its hearing under this by-law with the hearing conducted under the Wetlands Protection Act and the Regulations.

c. Commission Action. The Commission shall issue its permit, other order or determination in writing within twenty-one (21) days of the close of the public hearing thereon unless an extension is authorized in writing by the applicant.

Section 8. Coordination with Other Boards.

a. Coordination. Any person filing a permit application or a request for determination with the Commission shall provide a copy thereof at the same time by certified mail return receipt requested or by hand delivery to the Board of Selectmen, the Planning Board, the Board of Appeals, the Board of Health, and the Inspector of Buildings. A copy shall also be provided in the same manner to the Conservation Commission of the adjoining municipality, if the application or request pertains to property within three hundred (300) feet of that municipality. An affidavit of the person providing notice, with a copy of the notice mailed or delivered, shall be filed with the Commission.

b. Final Action by Commission. The Commission shall not take final action until the boards and officials have had fourteen (14) days from receipt of notice to file written comments and recommendations with the Commission, which the Commission shall take into account but which shall not be binding on the Commission. The applicant shall have the right to receive any such comments and recommendations and to respond to them at a hearing of the Commission prior to final action.

Section 9. Permits and Conditions.

a. Issuance of Permit. If the Commission, after a public hearing, determines that the activities, which are subject to the permit application or the land and water uses which will result therefrom, are likely to have a significant individual or cumulative effect upon the resource area values protected by this by-law, the Commission, within twenty-one (21) days of the close of the hearing, shall issue or deny a permit for the activities requested. If it issues a permit, the Commission shall impose conditions which the Commission deems necessary or desirable to protect those values, and all activities shall be done in accordance with those conditions. The Commission shall take into account the cumulative adverse effects of loss, degradation, isolation, and replication of protected resource areas

through the community and the watershed, resulting from past activities, permitted and exempt, and foreseeable future activities.

b. Denial of Permit. The Commission is empowered to deny a permit for any of the following reasons:

- (1) Failure to meet the requirements of this by-law.
- (2) Failure to submit necessary information and plans requested by the Commission.
- (3) Failure to meet the design specifications, performance standards, and other requirements in regulations of the Commission.
- (4) Failure to avoid or prevent unacceptable significant or cumulative effects upon the resource area values protected by this by-law.
- (5) Where no conditions are adequate to protect those values.
- (6) Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

c. Expiration of Permit. A permit shall, subject to the following exceptions and conditions, expire three (3) years from the date of issuance:

- (1) The Commission in its discretion may issue a permit expiring five (5) years from the date of issuance for recurring or continuous maintenance work, provided that annual notification of time and location of work is given to the Commission.
- (2) Any permit may be renewed once for an additional one (1) year period, provided that a request for a renewal is received in writing by the Commission prior to expiration.
- (3) For good cause, the Commission may revoke any permit, determination or other decision issued under this by-law after notice to the holder of the permit, the public, abutters, and town boards, and a public hearing.

d. Recording in Registry of Deeds. No work proposed in any application shall be undertaken until the permit or determination issued by the Commission with respect to such work has been recorded in the registry of deeds or, if the land affected is registered land, in the registry section of the land court for the district wherein the land lies, and until the holder of the permit certifies in writing to the Commission that the document has been recorded.

e. Lands within 200 feet of rivers, ponds and lakes, and lands within 100 feet of other resource areas, are presumed important to the protection of these resources because activities undertaken in close proximity to resource areas have a high likelihood of adverse impact upon the wetland or other resource, either immediately, as a consequence of construction, or over time, as a consequence of daily operation or existence of the activities. These adverse impacts from construction and use can include, without limitation, erosion, siltation, loss of groundwater recharge, poor water quality, and loss of wildlife habitat. The Commission may therefore establish performance standards and conditions for protection of such lands including without limitation strips of continuous, undisturbed, vegetative cover within 200 foot or 100 foot area, or other form of work limit or setback to buildings, roads, landscaping and other features, unless the applicant convinces the Commission that the area or part of it may be disturbed without harm to the values protected by the bylaw. The specific size and type of protected area may be established by regulations of the Commission.

f. To prevent wetlands loss, the Commission shall require applicants to avoid wetlands alteration wherever feasible, shall minimize wetlands alteration, and, where alteration is unavoidable, shall require full mitigation. The Commission may authorize or require replication of wetlands as a form of mitigation, but only with adequate security, professional design, and monitoring to assure success, because of the high likelihood of failure of replication.

g. The Commission, in an appropriate case, may combine the permit or other action on an application issued under this by-law with the Order of Conditions, Determination of Applicability or Certificate of Compliance issued under the Wetlands Protection Act and the Regulations.

Section 10. Rules and Regulations. After a public notice and public hearing, the Commission shall promulgate rules and regulations to effectuate the purposes of this by-law. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this by-law. At a minimum, these rules and regulations shall define key terms in this by-law not inconsistent with this by-law.

Section 11. Security. As a part of a permit issued under this by-law, in addition to any security required by any other municipal or state board, agency or official, the Commission may require that the performance and observance of the conditions imposed hereunder be secured wholly or in part by one or more of the methods described below:

a. By a proper bond or deposit of money or deposit of negotiable securities or other undertaking of financial responsibility sufficient, in the opinion of the Commission, to be released in whole or in part upon issuance of a Certificate of Compliance for work performed pursuant to the permit.

b. By a conservation restriction, easement or other covenant enforceable in a court of law, executed and duly recorded by the owner of record, running with the land to the benefit of the Town whereby the permit conditions shall be performed and observed before any lot may be conveyed other than by mortgage deed.

Section 12. Enforcement.

a. No person shall remove, fill, dredge, build upon, degrade, or otherwise alter resource areas protected by this by-law, or cause, suffer, or allow such activity, or leave in place unauthorized fill, or otherwise fail to restore illegally altered land to its original condition, or fail to comply with a permit or an enforcement order issued pursuant to this by-law.

b. The Commission, its agents, officers and employees shall have the authority to enforce this by-law, its rules and regulations, and permits issued thereunder by violation notices, non-criminal citations under G.L. c. 40 §21D, and civil and criminal court actions. Any person who violates provisions of this by-law may be ordered to restore the property to its original condition and take other action deemed necessary to remedy such violations, or may be fined or both.

c. The Commission, its agents, officers and employees shall have authority to enter upon privately owned land for the purpose of performing their duties under this by-law and may make or cause to be made such examinations, surveys, or sampling as the Commission deems necessary, subject to the constitutions and laws of the United States and the Commonwealth. Failure to grant such access shall be grounds for the issuance of either a cease and desist order or an Order of Conditions denying the project.

d. Upon request of the Commission, the Board of Selectmen and Town Counsel shall take legal action for enforcement under civil law. Upon request of the Commission, the Chief of Police shall take legal action for enforcement under criminal law.

e. Municipal boards and officers including any police officer or other officer having police powers, shall have authority to assist the Commission in enforcement.

f. Any person who violates any provision of this by-law or of the rules and regulations of the Commission, and the permits and administrative orders issued thereunder, shall be punished by a fine of one hundred (\$100.00) dollars for the first day of said violation, two hundred (\$200.00) dollars for the second day of such violation, and three hundred (\$300.00) dollars for each day thereafter that the violation continues. Each day or portion thereof during which a violation continues shall constitute a separate offense, and each provision of the by-law, rules and regulations, and permits violated shall constitute a separate offense.

Section 13. Burden of Proof. The applicant for a permit hereunder shall have the burden of proving by a preponderance of the credible evidence that the work proposed in the application will not have unacceptable significant or cumulative effect upon the resource area values protected by this by-law. Failure to provide adequate evidence to the Commission supporting this burden shall be sufficient cause for the commission to deny a permit or grant a permit with conditions.

Section 14. Appeals. Any decision made by the Commission under the provisions of this by-law may be appealed to the superior court in accordance with the provisions of G.L. c. 249 §4.

Section 15. Severability. The invalidity of any section or provision of this by-law shall not invalidate any other section or provision thereof, nor shall it invalidate any permit, approval or determination which has been previously issued.

ARTICLE 45

LICENSES AND PERMITS OF DELINQUENT TAXPAYERS

Section 1. The Tax Collector or other Town official responsible for records of all municipal taxes, assessments, betterments and other municipal charges, hereinafter referred to as the Tax Collector, shall annually furnish to each department, board or commission, hereinafter referred to as the licensing authority, that issues licenses or permits, including renewals and transfers, a list of any person, corporation or business enterprise, hereinafter referred to as the

party, that has neglected or refused to pay any local taxes, fees, assessments, betterments or other municipal charges for not less than a twelve month period, and that such party has not filed in good faith a pending application for an abatement of such tax or pending petition before the appellate tax board.

Section 2. The licensing authority may deny, revoke or suspend any license or permit, including renewals and transfers, of any party whose name appears on said list furnished to the licensing authority from the Tax Collector; provided, however that written notice is given to the party and the Tax Collector and the party is given a hearing not earlier than fourteen days after said notice. Said list shall be prima facie evidence for denial, revocation or suspension of said license or permit to any party. The Tax Collector shall have the right to intervene in any hearing conducted with respect to such license denial. Revocation or suspension shall be made only for the purposes of such proceeding and shall not be relevant to or introduced in any other proceeding at law, except for any appeal from such license denial, revocation or suspension. Any license or permit denied, suspended or revoked under this section shall not be reissued or renewed until the licensing authority receives a certificate issued by the Tax Collector that the party is in good standing with respect to any and all local taxes, fees, assessments, betterments or other municipal charges, payable to the Town as the date of issuance of said certificate.

Section 3. Any party shall be given an opportunity to enter into a payment agreement, thereby allowing the licensing authority to issue a certificate indicating said limitations to the license or permit, and the validity of said license shall be conditioned upon the satisfactory compliance with said agreement. Failure to comply with said agreement shall be grounds for the suspension or revocation of said license or permit; provided, however, that the holder is given notice of and a hearing is held as required by Section 2 hereof.

Section 4. The Board of Selectmen may waive such denial, suspension or revocation if it finds there is not direct or indirect business interest by the property owner, its officers or stockholders, if any, or members of his immediate family as defined in Section 1 of Chapter 268A of the Massachusetts General Laws, in the business or activity conducted in or on said property.

Section 5. This Article shall not apply to licenses and permits for open burning; bicycle permits; children work permits; sales of articles for charitable purposes; licenses to allow clubs or associations to dispense food or beverages; dog licenses; fishing, hunting and trapping licenses; marriage licenses and permits for theatrical events or public exhibitions.

Any person taking cognizance of a violation of a specific by-law, rule or regulation, for which there is a specific penalty and which he is empowered to enforce, hereinafter referred to as the enforcing person, as an alternative to a criminal proceeding, may give to the offender a written notice to appear before the Clerk of the Brockton District Court at any time during office hours, not later than twenty-one (21) days after the date of such notice. Such notice shall be signed by the enforcing person, and shall be signed by the offender whenever practicable in acknowledgement that such notice has been received.

Section 3. The enforcing person shall, if possible, deliver to the offender a copy of said notice at the time and place of the violation. Such notice as so mailed shall be deemed a sufficient notice, and a certificate of the person so mailing such notice that it has been mailed in accordance with this Section shall be prima facie evidence thereof.

Section 4. Any person notified to appear before the Clerk of the Brockton District Court as hereinbefore provided may so appear and confess the offense charged, either personally or through a duly authorized agent or by mailing to the Town Clerk, together with said notice, such specific sum of money not exceeding three hundred dollars as the Town shall fix as penalty for violation of the by-law, rule or regulation. Such payment shall, if mailed, be made only by postal note, money order or check. Upon receipt of such notice, the Town Clerk shall forthwith notify the Clerk of the Brockton District Court of such payment, and the receipt by the Clerk of Court of such notification shall operate as a final disposition of the case. An appearance under this paragraph shall not be deemed to be a criminal proceeding.

Section 5. The notice to appear provided for herein shall be printed in such form as the Chief Justice of the District Court shall prescribe.

Section 6. Any fines imposed under the provisions of this by-law shall enure to the benefit of the Town for such use as the Town may direct.

The Police Department may conduct State and Federal Fingerprint Based Criminal History check for individuals applying for certain licenses including those engaged in the business of Hawking and Peddling or other Door-to-Door Salespeople, Pawn Dealers, and Hackney Drivers.

An applicant seeking to engage in the above employment shall submit, if required by the licensing authority, fingerprints taken by the Police Department along with a fee of One Hundred Dollars.

Upon receipt of the fingerprints and the appropriate fee, the Police Department will transmit the fingerprints to the State Police Identification Unit through the Department of Criminal Justice Information Services (DCJIS), formerly the Criminal History System Board (CHSB).

In rendering a fitness determination, the Police Department will decide whether the record subject has been convicted of [or is under pending indictment for] a crime, which bears upon his/her ability or fitness to serve in that capacity, any felony or a misdemeanor, which involved force or treat of force, controlled substances, or was a sex-related offense.

A record subject may request and receive a copy of his/her criminal history record from the Police Department. Should the record subject seek to amend or correct his/her record, he/she must contact DCJIS for a state record or the FBI for records from other jurisdictions maintained in its file.

The Police Department shall establish, by rule or regulation, a civilian fingerprinting system for the purpose of conducting state and national criminal history records checks of persons applying for certain licensures within the Town. Any person applying for a license for the following activities within the Town is required to submit with the application a full set of fingerprints taken by the Police Department within 6 months prior to the date of application:

- Hawking and Peddling or other Door-to-Door Salespeople;
- Pawn Dealers; and,
- Hackney Drivers.

A person applying for a license and who is required to submit a full set of fingerprints to the licensing authority, pursuant to paragraph (a) of this section, may request and receive a copy of his criminal history records from the Police Department. Should the license applicant seek to amend or correct his record, he must contact the DCJIS, or its successor, for a state record or the FBI for records from other jurisdictions maintained in its file.

The fee charged to the applicant by the Police Department for the purpose of enforcing this section shall be \$100 for each application. A portion of the fee, as specified in Chapter 172B of the Massachusetts General Laws, shall be deposited into the Firearms Fingerprint Identity Verification Trust Fund, and the remainder of the fee may be retained by the Police Department for costs associated with the administration of the fingerprinting system.

The Town or any of its officers, departments, boards, committees or other licensing authorities is hereby authorized to deny any application for, or to revoke or suspend any license or permit, including renewals and transfers thereof, for any person who is determined unfit for the license, as determined by the licensing authority, due to information obtained pursuant to this by-law.
